

Qdata® Dry Eye Disease (DED) is the largest dataset of its kind and provides insights and outcomes on patients with dry eye disease and other ocular surface conditions.

Verana Health® delivers meaningful insights by ingesting, curating and analyzing real-world data from the American Academy of Ophthalmology IRIS® Registry (Intelligent Research in Sight) and linking it with other data sources such as claims and ophthalmic images.

- ✓ **Exclusive Coverage of the DED Patient Population**
Only found here
- ✓ **Granular Stratification of DED Patients**
DED patient types can be distinguished based on severity and test results
- ✓ **Detailed Understanding of Patient Outcomes**
Schirmer's test and TBUT data offer a clearer picture of DED signs and outcomes

Total in Qdata Dry Eye Disease:

25M+ De-identified patients with dry eye disease and other ocular surface conditions*	3.8 Years Median follow-up time
*Defined as Patients starting in January 2016 in the IRIS Registry who are 18+ years old and have 1+ indicator of ocular surface conditions from ICD-10 codes.	

Key Variables

Variable	Details	Estimated DED Patients
Visual Acuity	Visual acuity (VA) measures how sharp your vision is at a distance. It is usually tested by reading an eye chart. VA is an outcome measure found in EHR semi-structured fields.	25M+
Schirmer's Test	Schirmer's test is used to determine whether the eye produces enough tears to keep it moist, and is an outcome measure found in EHR clinical notes.	239K
Tear Break-Up Time	Measures how long it takes for the first dry spot to appear on the cornea after blinking, and is an outcome measure found in EHR clinical notes.	943K

Additional Variables for Discussion:

Corneal/Ocular Surface Staining, Dry Eye Questionnaires, LipiScan®/LipiView®, InflammaDry®, TearLab®

Demographics

Qdata Dry Eye Disease

Potential Applications:

Ways to Engage Us

* Data current to April 2026. Data counts represented are subject to change.
Data counts for research purposes are dependent on project scope and feasibility.

About Verana Health

Verana Health, Inc.® is a digital health company revolutionizing patient care and clinical research by utilizing physician expertise and artificial intelligence to unlock the true potential of real-world data. With exclusive access to the world's largest patient data sources in oncology, ophthalmology, neurology, and urology. Verana Health is powering real-world evidence generation. Clinicians utilize these insights to improve the quality of care and quality of life for patients, and life sciences companies rely on the insights to accelerate the development of new therapies.
