

Qdata® Geographic Atrophy (GA) is an exclusive dataset that links EHR and ophthalmic imaging data for a comprehensive view into the GA patient journey.

Verana Health® delivers meaningful insights by ingesting, curating and analyzing real-world data from the American Academy of Ophthalmology IRIS® Registry (Intelligent Research in Sight) and linking it with other data sources such as claims and ophthalmic images.

✓ **Exclusive Coverage of the GA Patient Population**

Only found here

✓ **High-quality, Image-derived Insights**

Using machine learning and computer vision algorithms

✓ **Comprehensive View into Disease Progression & Severity**

From diagnosis to subfoveal involvement and more

Total in Qdata Geographic Atrophy:

1.4M+ De-identified patients with GA*	2,900+ GA patients confirmed via images**	5.4 Average years of follow-up data
*Defined as patients who are 50 years or older and who have an ICD-10 code for GA (H35.31x3,4) or ICD-code for age-related macular degeneration (AMD) and either an image or clinical note indicating geographic atrophy between January 2013 and April 2026. Data counts represented are subject to change. Data counts for research purposes are dependent on project scope and feasibility. **GA patients confirmed via images and an ICD code as well as only via images
